BASSANO PREPARES FOR BIG CELEBRATION JULY 2

Bassano Program Planned for Crowd Expected for Biggest Stampede, Sports and Carnival

The committee in charge of the Dominion Day stampede and celebration is working hard on the program. The complete list of events is not yet prepared, but it will include horse races, bucking horses, steer riding, and rodeo, football games, and various events that go to make up a complete stampede program. A good list of athletic events will be run off for both children and adults. These are always interesting and keenly contested. There will be the carnival, entertainers, and evenings when the crowd will be amused and entertained.

It is planned to hold a dance at night in an open air pavilion, and this should prove one of the most attractive features of the day.

Monday, July 2nd is the day of the celebration. July 2nd is a statutory holiday as Dominion Day falls on Sunday.

Home Runs Feature Game At Meadowbrook

Bassano Beaters Banbury Out Five Crests Bows in Singlet

The hard hitting Bassano Beaters invaded Meadowbrook last Sunday afternoon, June 3rd, and defeated the baseball aggregation of that place by the score of 16 to 7.

The members of the Bassano team were leaders of the attack which cracked the Meadowbrook pitchers right out of the box, and lit the horseshoe for five home runs during the game.

Four home hits were scored by Ralph Burrows, Tom McLean, H. R. Parsons, G. Lethbridge and L. French.

The Meadowbrook team got in some good work with the bat too, and Bassano had to use three pitchers to keep the home team from hitting the ball for the first four innings. He was relieved by Ralph Burrows who handled the next three innings, and Runions finished the game.

Score by Innings

Bassano 1 0 2 0 0 0 5 0 7
Meadowbrook 1 1 0 0 0 0 5 0 7

A. Simpson bat; H. Runions 2b.; Ralph Burrows 3b.; L. Newby 1b.; S. Rutherford r.t.; L. Roach 1f.; G. Lethbridge c.; A. Margaret p.; Royal Burrows c.f.

In the fourth frame Ralph Burrows went into the pitcher's box. The play was on. Ralph Marquardt going to left field, and Newby to second base, Runions going to third base.

WILL CARRY ON BUSINESS

Contrary to all rumors, Mrs. J. Torgan wishes to announce that she will carry on the business in her own name, and will appreciate the continued patronage of all her customers.

Bassano Creamery Makes Large Quantity Butter

About 1000 Pounds a Week Now Being Churned

The Bassano creamery is one of the best places in town these days. Manager W. A. Brodie announces that he is churning more cream than at any other time since he opened the creamery. The production amounts to about 1000 pounds a week and the butter is being churned to be exceeded within a short time.

Considerable improvement has recently been made on the creamery building by the application of a fresh coat of paint, and a new sign. The interior of the plant is arranged so that the machinery is conveniently placed and everything is kept spotless and sparkly.

Farmers from all over the surrounding country ship cream to the Bassano creamery. Shipments come from Gem, Rosemary, Coopers, Duchess, Millarville, Pincher, Iddesleigh, Chancy, Crowfoot, Castle and Brooks, and in addition to the cream that comes in by express, many farmers deliver their own produce to the creamery.

Mr. Brodie says that the cream he receives is of the very highest quality, grading No. 1, and some of it is special.

For quality Bassano Creamery butter ranks with the best made, and practically all the stores and cafés in town handle it exclusively. The creamery is located in the Bassano, in the neighborhood of Bassano also sell the butter made by the creamery here.

M. MacLean Takes Over Mail Hauling Contract

Government May Amend Dominion Elections Act At The Next Session

Ottawa.—Preliminary with address itself next session to the amending of the Dominion Elections Act if the report of the committee on privileges and elections is adopted by the House of Commons.

The committee, under the chairmanship of Mr. W. L. Lunn, Liberal, Juliet, considered their report, the result of several weeks of investigation into the Athabasca election of 1921, and an inquiry by Mr. Justice Clark of Edmonton, established that corrupt and illegal practices had taken place.

The committee will recommend to the House that since the report of Mr. Justice Clarke discloses that the cause of the Athabasca election in Athabasca was due to the partiality, ignorance and inexperience of certain election officials, the auditor-general should submit to the Department of Justice a full statement of the facts and the advice of the above-mentioned officials to instituting proceedings for the recovery of the amounts so paid to such officials, if the law provides for such action.

It is also recommended that a special committee be appointed next session to examine the evidence and deliberations of the present committee on privileges and elections, to study the Dominion Elections Act and to give special attention to the methods of selecting returning officers and the preparation of voters lists.

Further, it is urged that the chief electoral officer should recommend to the proper authorities that prosecutions be taken against violators of the Dominion Elections Act.

Civil Aviation In Italy

Development Is Rapid and Country Holds Third Place In World

Rome, Italy.—Italy now ranks as the third country in the world for civil aviation. It comes immediately after Germany and France, in the order given, and is ahead of England, which occupies fourth place.

By the end of 1925 Italian air routes will total 2,900 miles, over which daily 1,200 passengers in air mail and air mail services will be carried, with 100 aircraft.

The whole field of civil aviation, ever since Italo Balbo became Under-Secretary for Air, has been developing at such a rapid rate that many miles already have been added to the total number of air routes.

Vote Sum For League

Ottawa.—The House passed a vote of \$155,968 for Canada's contribution to the League of Nations. Hon. Hugh Guthrie brought up the question of German currency held by the Canadian, which had been remitted by the Canadian Government. The Prime Minister pointed out that before the Government could do anything in such a case it would have to consider the whole question of speculation, which would be very difficult indeed.

To Aid Mental Hygiene Research Toronto.—The Laura Spelman Rockefeller Memorial, founded by John D. Rockefeller, has announced that it will give \$100,000 for research in Canada by the grant to the Canadian National Committee for Mental Hygiene of \$150,000 to be spent during the next five years. This is conditional upon the raising from Canadian sources of an additional \$35,000 during the same period.

Humor Is Denied

Winnipeg.—The effect that he had been offered the position of University of Alberta were denied by Hon. John Bracken, premier of Manitoba. "The rumors are without foundation," he declared.

Complain About Expenses

Ottawa.—Complaints of Canada House were heard in the House when a vote of \$70,000 for contingencies and \$30,000 for salaries for the high commissioners' office in London were under discussion. After considerable debate, the item carried.

Turkestan-Hallian Treaty

Rome.—Premier Musolini and the Turkish Minister of War, Hay, have signed a five year bilateral treaty binding Italy and Turkey to neutrality, arbitration and conciliation.

Toronto.—Near Hanover City Kansas City, Mo.—A tornado struck Empleewood, a suburb between here and Independence, Mo. Two street cars were reported wrecked. Ambulances were sent to the scene.

W. N. U. 1736

Operate On Cost Basis

Alberta Wheat Pool Elevator Adopt New Policy

Calgary.—Wheat Pool elevators in Alberta will be operated on a cost basis, it was decided at a meeting held with a full attendance of Pool delegates in convention here.

The new policy laid down will result in economies and in savings to all who buy grain in the world. It means that the member will be charged only the bare cost of operating the elevator facilities.

When they haul their grain into elevators there is no service charge whatever is made. At the end of the fiscal year the actual operating cost will be available and will be deducted from the final Wheat Pool payment.

The change in elevator policy was recommended to the delegates by the directors. The proposal was to eliminate handling and service charges upon delivery of the grain to the Pool elevator and deduct the actual operating cost a per-bushel basis from the final Wheat Pool payment.

Would Provide Work For Ex-Service Men

Resolution Favors This As Best Memorial To Earl Haig

London.—The ex-service men at the British Legion conference passed a resolution in favor of a scheme which that could be paid to Earl Haig would be providing work instead of relief for ex-service men.

Lady Haig was present and said this would have met with the approval of her late husband, who would have been, in a sense, of himself, but that the men who had fought in the war should be helped.

It is understood that the resolution and Lady Haig's remarks were not intended to deprive the Legion of the national subscription to the late Field Marshal, which the Government is now considering.

British ex-service men will attend the conference of ex-service men, including former members, to be held in Luxembourg next September.

Inspection Satisfactory

Objectation To Examination Of Immigrants By Canadian Doctors Unwarranted

Toronto.—The government examined every single objection that has been raised against the examination overseas by Canadian doctors of passage immigrants and we have not found one that will hold water," declared Dr. David Clark, assistant Deputy Minister of the Department of National Health and Welfare, in an interview.

Dr. Clark pointed out that before the Government could do anything in such a case it would have to consider the whole question of speculation, which would be very difficult indeed.

To Aid Mental Hygiene Research Toronto.—The Laura Spelman Rockefeller Memorial, founded by John D. Rockefeller, has announced that it will give \$100,000 for research in Canada by the grant to the Canadian National Committee for Mental Hygiene of \$150,000 to be spent during the next five years. This is conditional upon the raising from Canadian sources of an additional \$35,000 during the same period.

Replace Provincial Police

H.C.M.P. Have Taken Over Work Of Saskatchewan Force

Saskatoon, Sask.—The Saskatchewan Provincial police force has given up the task of fighting crime in the province, their activities being taken over by the Royal Canadian Mounted Police, the Saskatchewan sub-division being under the direction of Inspector John Kelly, who transferred from the Royal Canadian Mounted Police.

Some other members of the S.P.P. will join the R.C.M.P., while the following members of the latter force, located at the Saskatoon detachment for some time, will remain: Sergeant G. E. Hillyard, and Constables T. Theriault and F. W. English.

The first two have a long service record in the force, dating back to the old Northwest Mounted days.

Appoint Conciliation Board

Ottawa.—A conciliation board had been appointed to investigate the case of Mr. John Clarke, who will be chairman. James H. Gordon will represent the employers, Robert Hewitt, the men. The men are asking for an increase of 12½ cents an hour.

U.S. Honors War Dead

Thousands Attend Memorial Service At Arlington Cemetery, Washington

Washington.—The White Crossed rolling hills of Arlington beckoned the nation to a memorial day exercises outside of Washington. His annual tribute was paid in an address near the spot where Abraham Lincoln, the immortal address in Gettysburg, Pennsylvania, was delivered.

Practically the entire day was set aside for services arranged by patriotic and veterans organizations. A feature was a parade of veterans of all wars, including the downtown streets and over to Arlington.

Sir Ernest Howard, British Ambassador, and Hon. Vincent Massey, Canadian minister, took part in the services in Arlington cemetery where they described the services and the sacrifice of Canada in memory of Americans who died while serving as members of the Canadian corps.

The possibility that a Canadian bridge will link the U.S. on the part of the court of arbitration of the Hague will be opened by the resignation of John Bassett Moore, of the United States, is now openly acknowledged in well-informed circles at Washington. Already, it appears, the Canadian Minister of Transport, Mr. J. L. M. Smith, is well on the way to Toronto (above), as well-known almon in the United States as in Canada, is mentioned as a likely successor to the American jurist.

The Canadian National Railways increase in gross revenues, compared with the previous year, was \$70,000,000, or 12½ per cent, and passenger revenues were heavier than in 1927 by \$1,200,220, or 3½ per cent, net revenues were larger by \$883,230.

The large carry-over of grain has been the chief factor in the heavy traffic and census of the nation during the first quarter of 1928, the movement of grain to the Pacific ports being particularly heavy.

The March payroll was heavier than in 1927 by \$1,037,133, and the average number of employees increased by 3,622.

The Canadian National Railways increase in gross revenues, compared with the previous year, was \$70,000,000, or 12½ per cent, and passenger revenues were heavier than in 1927 by \$1,200,220, or 3½ per cent, net revenues were larger by \$883,230.

The Canadian Pacific Railway gross revenues for March, 1928, were \$120,540,000, a 5½ per cent increase.

Passenger earnings, however, showed decreases but all other accounts were larger, freight by 12.5 per cent.

The Canadian Pacific Railway

May Receive Appointment

Record During March For Canadian Roads

Railways Carry More Freight Than In Any Previous March

Ottawa.—The Canadian railways carried more freight during March, 1928, than in any previous March. Gross revenues also were the largest earned in March, exceeding those of March, last year, by \$2,135,479, or 5½ per cent. The total number of passengers were heavier than in 1927 by \$1,200,220, or 3½ per cent, net revenues were larger by \$883,230.

New Mineral Discovery

Citizens Of Saskatoon Leave Work To Stake Claims

Saskatoon.—A rush, in the nature of a small stampede, is now taking place to stake claims on the shores of Lake of the Woods, a natural extension of the 10th anniversary of the creation of the Union of South Africa.

The celebration was historic because for the first time the new nation had its own flag, the Union Jack, and President J. M. Harting and General Jan Christian Smuts, former premier, and present leader of the opposition, appeared on the same platform and delivered patriotic speeches.

Scenes witnessed were re-enacted when excited crowds filled the streets and several ugly incidents occurred. Colored people were prominent in the demonstrations and automobiles of the New Unionists were particularly popular, because which carried miniaatures of the Union Jack were not touched.

The police were forced to charge the massed ranks of demonstrators.

A dozen persons were injured, while 50 persons were arrested.

In his address at the celebration President Harting said the new flag was a "lasting symbol of the independence and existence of the power and authority of the South African nation."

Referring to the flying of the new Union flag over the Union Jack, General Smuts declared two months ago that the two emblems symbolized the equality of the races and the indissoluble brotherhood which had flowered out of the emblems and struggles of the past.

Stops Operations Of Bogus Stock Salesmen

Ontario Government Has Put Many Out Of Business

Toronto.—More than one hundred dealers, of doubtful repute, and high and low, have been put out of business recently as the result of the clean-up campaign initiated by the Ontario Attorney-General in connection with the Security Frauds Prevention Act put into force recently.

According to the department some of the offenders have been jailed, others are cut on bail pending appeal and a majority have been deported to the United States, from whence they came.

Receive Degrees At McGill

Honorary Degree Conferred On Five Distinguished Candidates

Doctor of Laws was conferred on five distinguished candidates at the 1928 convocation of McGill University.

The recipients were: Sir Wilfrid Grenfell, famous Labrador missionary; Dr. James C. Ross, Arctic explorer; Dr. R. G. Reid, author of "The New York Zoological Park and a graduate of McGill"; George Isles, writer; and Julian C. Smith, financier.

Sir Arthur Currie, principal, had not sufficiently recovered from his recent illness to be present.

Princes Plan African Trip

London.—The Prince of Wales who plans a tour of Africa has invited the Duke of Gloucester (Prince Henry) and the Royal brothers will be absent for four or five months.

The Duke of Gloucester, however, has accepted an invitation to attend the coronation of King George VI in June.

Prince Edward, the Duke of York, has accepted an invitation to attend the coronation of King George VI in June.

Prince Albert, the Duke of York, has accepted an invitation to attend the coronation of King George VI in June.

Prince Philip, the Duke of Edinburgh, has accepted an invitation to attend the coronation of King George VI in June.

Prince Charles, the Prince of Wales, has accepted an invitation to attend the coronation of King George VI in June.

Plane Service Cuts Two Days

Pilot J. H. St. Martin accepts the first shipments of parcels by the new Canadian Pacific air-express service. Bi-weekly in each direction between Toronto, Ottawa, Montreal and Rimouski, where the steamers are met, the new service cuts two days of the regular schedule. Domestic traffic between the cities mentioned is also accommodated to time-saving advantage.

"It is my earnest hope that jucce will above all else for ourselves and for other nations is a 'continuance of peace,'" Mr. Coolidge reviewed negotiations by the state department for entry into war and for arbitration treaties.

The Brand proposal that the United States and France sign a treaty to renounce war was described by the President as having developed into "one of the most impressive peace movements that the world has ever seen."

"It is my earnest hope that jucce may now crown the negotiations so far in progress and that the French and Canadian ministers will now proceed to the signing of the peace treaty," Mr. Coolidge said.

Mr. Coolidge said that the peace treaty of 1919 was signed at Versailles.

"It is my earnest hope that jucce may now crown the negotiations so far in progress and that the French and Canadian ministers will now proceed to the signing of the peace treaty," Mr. Coolidge said.

"It is my earnest hope that jucce may now crown the negotiations so far in progress and that the French and Canadian ministers will now proceed to the signing of the peace treaty," Mr. Coolidge said.

Dreadful Error

General: "Lads here, my man, why don't you be careful?"

Army Clerk: "What is wrong, sir?"

General: "Why, instead of addressing this letter to the 'intelligent reader' you have addressed it to the 'dreadful error.' You should know there is no such person in the army."

ALBERTA FIRE LOSS IN 1927

Thirty-three deaths and property losses amounting to \$1,775,000 occurred in Alberta during the year 1927 according to the recently issued report of Henry Bruce, provincial fire commissioner. Fire losses from the burning of dwellings, stores, barns and various amounts of more than \$1,200,000, or 68 per cent of total fire losses for the year, and it is pointed out in the report that practically all of these fires were due to carelessness in some form or other.

During 1927 a total of 1500 citizens and their families in the province were visited and inspected by officials of the fire commissioner's office, and 637 orders were issued for the correction of defects. Convictions un-

der the Fire Prevention Act during the year totalled 26, or 4.7 per cent of those brought to trial.

WED' CONFERENCE TO BE HELD

In connection with the extensive program of weed control and eradication to be conducted during the coming summer, arrangements have been made to hold two-day conferences at a number of points in the province in the next month. These will be held at the four provincial schools of agriculture, at Raymond on June 10 and 11; Claresholm June 15 and 16; Olds, June 19 and 20; Vernon, July 2 and 4, and at the University of Alberta July 6 and 7.

HELPING THE SWIMMING POOL

Now that the construction of the swimming pool is under way, everyone will be given an opportunity of contributing money for this world's first swimming pool.

The swimming pool committee plan to make a complete canvas of the town. They want funds to finance the cost of building dressing rooms and other equipment.

Give what you can - it is the fund a dollar, two dollars, five dollars, or any larger amount you feel you can afford. The committee will accept any donation, no matter how small or how large.

It is the desire of the committee that until the canvassers visit you, or if you are overlooked in the canvass, just see one of the committee men, G. Travis, M. D. Macdonald, or Roy Smith, and they will be pleased to relieve you of the amount you wish to contribute.

The swimming pool will be a great thing for the boys and girls, and for the adults, too, especially for the boys and girls. We should get behind it and help it all we can.

OH, MORPHIUS,
WHERE ART THOU?

Man's day is triple: a work day which has been shortened, a day which has been correspondingly lengthened, and a sleep day which so far as is definitely known, has been neither shortened nor lengthened with the progress of mankind.

Greater mental activity, artificial light, more time for social and other noise and distractions of the city may have subtracted something from the sleep period of millions. But it may be that modern man needs more sleep to knit up "the ravaged sleeves of care," and that the ravage is greater in the day of high tension than when man found it easier to make a living and less to do when he was not engaged in the actual business of earning money.

It would be interesting to know how many hours the savage sleep as compared with the chemist who proposes a chemical substitute for sleep.

Science has come to look upon the body as a collection of elements whose reactions determine the physical condition of man's being. This has led the scientist to propose a diet which may best supply what the body needs and has suggested that the idea of "discoitus" or of crossing a man's body will be of some use and re-combine the elements which sleep has alone been able to convert from the poisonous to the benign that man may have longer days without lessened years.

No other disease work much as a carrier in human society. It would fascinate the imagination to try to think of the social changes which would follow the discovery of a synthetic substitute for sleep.

Though man for ages has assumed that the house fly was a carrier of disease to mankind, the scientist who makes sleep unnecessary will be blessed even more than "the man who first invented sleep."

SWAT THE FLY

The common house fly is a menace to health, and being a menace to health it is a menace to happiness, for health is essential to true happiness.

The fly is a carrier of disease germs. His hairy legs are loaded with filth and tiny microbes, that will, if they become lodged in the human body, cause serious sickness, and possibly death.

Keep the fly out of your home. If him, he will not breed in your house, and his numbers will be less.

Medical science knows what a germ carrier and spreader of disease the house fly is. If everyone knew this the house fly would become almost extinct and there would be less disease.

No Need to Worry

All adult Freshmen with incomes under \$720, a year are entitled to State insurance against sickness, accident, old age and maternity.

—San Diego paper.

Missing Buttons

Lindbergh sends his shirt to the laundry that mended them for him. In contrast, we are not so popular; they only take parts of ours.

—Judge.

Growing Up and Up

Sweet Sixteen: "Mother, I'm tired of looking such a kid—couldn't I have shorter frocks now?"

Judge.

THE SMALL GHOST

The lights were low and by the fire some guests were listening to the speaker.

"The house is in the sixteenth century.

It also has a ghost," said he.

"A little lady dressed in white.

Wanders about this room at night.

Because—or so the story goes—

Her she was done to death by fire.

"It happened on a Christmas Eve—

Or so the village folk believe."

And since that time at twelve o'clock

Whoever sees her gets a shock."

The group of guests, a modern crowd

Were sceptical, and laughed about it.

One man remarked, "An old wives' tale."

Then faltered, stopped, and turned quite pale.

The women gasped, one gave a scream.

It seemed to them like some bad dream.

For they saw in the semi-light

A tiny figure clad in white!

Sheer panic seized them, no one stirred.

The figure stopped—and then they heard

A charming little voice which said,

"Mummy, please need I stay in bed?"

L. M. Oyler.

MOTHERS WITH LITTLE SONS

O mothers with little sons,

Who stand with little faces,

And look with little eyes;

Or when the long day is over;

And the dead men sleep their cause;

And the crippled men implore;

"Go fashion the future laws

That shall be no more."

For war is a knave's design

And a coward's brutal scheme,

And the men who courage is divine

Shall foster a nobler dream.

O mothers with little sons,

These years lie in your hands;

You are the chosen ones;

With your commands;

Not till you have done,

"Our sons no more shall fight."

Shall the crimson soil be fair

And the ravaged earth be right.

Jim: "That's a wild, wild girl you have, Jim."

Joe: "Well, she was wild. But I've got her so tame now she'll eat right out of my purse."

NEW RESEARCH BUILDINGS AT UNIVERSITY

Increased accommodation is being

provided this year in the development

of the new buildings of the University

of Alberta by the erection of a new

laboratory and greenhouse for the

study of plant pathology and plant

breeding. This additional space

will make possible the carrying out

of a great deal of work by the Uni-

versity, the Federal Department of

Agriculture, and the National Re-

search Council on the problem of

rot-rot diseases.

CARDSTON TO HAVE \$60,000 HOSPITAL

Announcement is made by the de-

partment of Indian Affairs that a

hospital costing in the neighborhood

of \$20,000 will be erected in the town

of Cardston. Construction work

will start very shortly on the build-

ing, which is intended for the bene-

fit of the Blood Indians in that sec-

tion of the province.

ROAD TO BE COMPLETED TO JASPER PARK

Work is now proceeding on the road between Edmonton and Jasper, it is announced by L. C. O. McLean, manager of public works. A crew has commenced work on the section between Old and Bliss, and it has been found necessary to follow the old railway grade for only about a mile. With the completion of this, after the Jasper Park, the new motor road right through from Edmonton will be provided. While it is not planned to do any graveling on this road this summer, under satisfactory weather conditions it should be in good shape for motor travel.

Two sections of road will be won on the Peace River between Lethbridge, Slave Lake and High Prairie, and work will commence shortly on the link between Smith and the eastern end of the lake. The section between Old and Bliss, the construction will be necessary on this section, connecting at Enfield with the Grand and High Prairie road. Conditions are reported to be considerably better along the route than during last year, and it is expected that good progress will be made with the completion of the highway.

Pass the Asbestos Spoons

A colored dressed down south was trying to explain the fury of his horse.

"You all in some motion iron runn'n out from a furnace, ain't you?" he asked.

The congregation said it had.

"Well," the preacher continued, "dey uses dat stuff to ice cream in de place what I'm talkin' about."

Miss Jean Cameron, who came to the city from the country at the age of four, at ten commenced trapping in the district of her home. At the age of 21, she finds it quite a bore, and congenital pursuit, and quite appropriate occupation which would keep her in the city. She traps a fox with a ten foot radius of her house, and her catch includes coyote, lynx, weasels, fox.

A colored passenger on a freighter said that he only been to Canada and a passenger ship was recently accomplished when the Canadian Pacific Railway docked at the Surrey Commercial Docks, London, nine days after the first out of Montreal of one of the new "Beaver" vessels and this required a week to get to the port. After fifteen hours now, that the Beaverburn and vessels of her class are rounding the Straits of Beale Isle.

Seed growing is of great interest in the country of Vancouver,胎生 of steadily increasing importance. Vancouver Island seed per acre is about 100 lbs. and the price three to four shillings per pound more than the California seed. The Island seed is produced by Mr. W. Duncan, which produces yearly about two tons. From 15 to 20 men are employed to clean, pick, clean and pack the seed, the quality and high quality of which is being well appreciated.

Am the sport of fishing with a minimum of destruction of fish was realized recently when a party of Englishmen, who were members of the League of American Fishermen, took the salmon fishing on the Canis River, New Brunswick, and released them all. The salmon and returned them to the water. The Englishmen were fishing from 25 pounds to an average of fifteen lbs and were taken with barbless hooks and taken in a line. The sport was enjoyed but the fish were in no way injured, when returned to their natural stream.

Health Service of the
CANADIAN MEDICAL ASS'N
FLIES

Insects play an important part in the spread of disease. Typhus fever, which was also known as jail or ship fever, is spread by the body louse and has disappeared as a result of greater personal cleanliness. Yellow fever and malaria are spread by certain insects.

In Canada our chief problem, from the standpoint of disease amongst human beings, is the common house fly. Because the fly is covered with minute hairs, and because of its habit of lighting and feeding on all sorts of filth, the fly carries and transfers filth from one place to another.

Flies feed on anything, including body waste and secretions. When they light on such material, it sticks to them and carries with them their next point of rest, which may be the milk jug, or the food on the table. If the filth to which they have been contained disease germs they carry these along with the filth.

The fly feeds by sucking up its food, and when it has taken its insect discharge fluid from its stomach to moisten it, and thus it passes out some of the filth. It has previously fed upon to what ever it now seeks to eat.

A fly breeds in collections of waste organic matter, such as garbage, but preferably on horse manure. Such breeding should be prevented by proper covers and regular removal. Outside entrances should be screened to prevent entrance of flies. Flies should be screened.

Flies are really dangerous. They do spread disease and so, should be destroyed.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered by letter. Questions as to diagnosis and treatment will not be answered.

Here and There

(79)

The Rocky Mountain Lakes fishing season opens with a catch of a thirty-five pound lake trout by George Andrews of Lethbridge, and a number of others of not such a great weight were caught by guests of the Duke Springs Hotel.

The month of April was the most successful month for the sale of standpipes of families settled, according to a statement issued by the department of agriculture.

During the month 61 families were settled throughout the Donalda, 13,249 acres of land, making the total of settlements from the year up to 224 on April 30.

There are in Alberta today 77,129 farms who have 814,224 horses in use and 10,225 tractors. In Saskatchewan there are 78,182 farms with 1,199,564 horses and 1,987 tractors. Manitoba has 51,268 farms with 1,000,000 horses and 1,412 tractors. The survey would indicate that while the horse is yet the chief power on the farm, the day of the tractor has definitely arrived.

Miss Jean Cameron, who came to the city from the country at the age of four, at ten commenced trapping in the district of her home. At the age of 21, she finds it quite a bore, and congenital pursuit, and quite appropriate occupation which would keep her in the city.

The day of the tractor has definitely arrived. The price being paid for these pigs is altogether too high, and the taking of these young gits depends upon the ability of the company to organize other clubs and sell the stock and equipment at a reasonable price.

The contract states that the gits will be taken back at a certain price if up to a certain standard. The question at once arises as to who will have the final say about the standard. It will depend upon the company to determine. The standard is not something that can be determined by mathematical calculation, but is entirely a matter of opinion or judgment.

CONTRACTS LIFT FOR NORTHERN RAIL EXTENSION

Contracts for the northern railway extension authorized by the provincial government from Whitehead, Waterton and Lethbridge to Hythe have been awarded to Meissner, Ross, Wilkstrand and Brooks. It is announced by the department of railways that work on the extension from Whitehead to Hythe will proceed with immediate action on the Wembly-Hythe link being delayed to some extent pending the granting of some necessary charter by the federal government.

GOVERNMENT WARNS AGAINST PURCHASE OF CHESTER WHITE HOGS

The following article dealing with Chester White hogs is issued by the Alberta department of agriculture:

"It has been brought to the attention of the department of agriculture that representatives of the Central United States Swine Company are building their way north and are now busy in the Blindman Valley, Sietster, Clive, Steeples and elsewhere."

"The company does not approve of the Chester White breed of hogs as they are distinctly of the lard type, and provincial and dominion governments have been for years trying to encourage farmers to raise the bacon type, which is the one in demand for bacon, and the very limited and uncertain market for lard hogs."

"As stated in a previous article, the department of agriculture of the province is in the market for bacon hogs; giving an order for an animal without having seen it is not good business. Officials of the department have seen the hogs at Coats and report them a poor lot and many of them, including the boars, are very fat and not good bacon."

"The price being paid for these pigs is altogether too high, and the taking of these young gits depends upon the ability of the company to organize other clubs and sell the stock and equipment at a reasonable price."

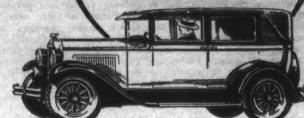

The contract states that the gits will be taken back at a certain price if up to a certain standard. The question at once arises as to who will have the final say about the standard. It will depend upon the company to determine. The standard is not something that can be determined by mathematical calculation, but is entirely a matter of opinion or judgment."

a success in

A Better Car than Ever at its Price

THE New Series Pontiac Six was designed and built in the belief that everybody admires style in a motor car.

So, in Pontiac Six, everybody can enjoy it!

Beautifully proportioned bodies that tell their Fisher craftsmanship at a glance. Low, long lines and top, massive radiators and bumpers. Rich harmonies of color in exterior Duco and interior trim . . . Delightful evidence of luxury in upholstery and appointments . . . The New Series Pontiac's powerful Six-cylinder engine . . . the safety of Four Wheel Brakes . . . Shock Absorbers.

No wonder the New Series Six is literally in its field in style and refinement. Prove it all for yourself by a demonstration. Ask your dealer about the G.M.C. Delivery Plan which makes buying easy.

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

Speeding up Freight Service

The recent installation of Mack Tractors and Laper Trailers by the Dominion Transport Company Limited, for the transfer of live freight between Canadian Pacific freight sheds and their cutting terminals in the city, was demonstrated before E. W. Beatty, Chairman and President, and other executives of the railway outside the Whitehead station.

Mr. Beatty was specially interested in the mechanism by which the trailer is connected up with the tractor, and the manner in which the task of backing the tractor slowly into the trailer. Uncoupling is affected from the tractor by the simple motion of a lever, and the entire operation is performed several times and expressed his appreciation of their simplicity.

Operation of the trailer is operated by means of a mechanism known as a fifth wheel which is bolted to the tractor frame and upon which the trailer rests. The trailer is attached mechanically with the trailer through the use of rail-type double locking juncos. Brakes on both the trailer and the tractor are applied separately by the driver and are at all times under his control. Once it is possible for a trailer to be disconnected from the tractor while in motion, the brakes of the former are automatically applied bringing it almost "dead" to a stop.

The trailer is "dead" only when it is being loaded or when the extra load is being taken off. It is divided over a greater surface area, thus overcoming the deteriorating effect of heavily loaded trucks on the highway.

The capacity of the trailers used is 10,000 to 15,000 pounds with an average of approximately 12,000 pounds of freight wide and 7 feet high. The tractor is of the internationally known "Bull" type and its use in the city in excess of anything else required by the company is considered as being of great value. It is considered advisable to use in view of the heavy road conditions prevalent in the city.

While the tractor is of standard Mack design, only the chassis is in the case of the trailer, the body being built and finished in the Transport com-

pany's plant in Montreal. The body is of oak throughout with a sheet metal covering and the whole equipment is highly finished in dark blue with red wood and white leather. The distinctive badge of the company, making a very distinctive appearance. The centre side panels or sliding doors of the trailer as well as the front and rear panels are decorated with the Maple Leaf and Beaver insignia of the Canadian Pacific Railway. The doors of the tractor are decorated with the same emblem. The company have at present nine trailers in operation and will increase this number to twelve in the next few months. An order for a tenth trailer has been placed for use in Toronto by the company.

Mack Tractors and Laper trailers represent the latest in efficiency and economy of operation. It consists of spotlighting one or more trailers at strategic points where freight is to be picked up. When the trailer is loaded, it is taken to the destination in turn, taking them to their respective destinations under what is known as the Shuttle System. By this means the company can have one tractor in constant use between each of the outlying freight depots and the city, and the cost of freight to merchants and manufacturers of these outlying districts the same despatch with their freight as those who are more centrally located.

Dipping Into The Future

London Daily Mail Issues Clever
Edition Dated January 1, 2000

Half a century ago Tom Swift, a writer of dime novels, wrote of dipping into the future "as his mind's eye could see," and stated he "saw the vision of the world and all the wonders that would be." Some of the things that the author of *Tom Swift of England* spoke of have become the common-place actualities of today. And now The London Daily Mail has taken a "dip" into the future and has issued a special centenary edition of the paper, the dateline of which is January 1, 2000. It is a clever imaginative presentation of events and occurrences as these will be related in the press exactly one century from now. It is a remarkable effort to think that people will be living in that time, that is, provided the imaginations of The Daily Mail's reporters have not run away with them. "Television" bulletins will give news of the world as it is to be seen 12,000 miles away. People who hope to live to the year 2000 can look forward to being murdered by "suggestion" or by "concealed beam" rifles Those who find their memories failing are able to use the "memory impressors" while they may one day be able to apply "memory impressors" while they sleep which will help the brain to function admirably when the sleeper awakes.

To interpret the world as it may exist when another three score and ten years have passed open up an interesting field of speculation for the imaginative. The present period of progress, it is safe to say, that every condition of human life will be completely revolutionized by the year 2000. But, gifted even with the most vivid imagination, it is impossible to conceive of the conditions in which people will be living in that time. One has only to look at the amazing progress made during the last ten years to be convinced that it has not entered into the heart or the mind of man what the human race shall be when the third millennium of the Christian era dawns.—Toronto Star.

ESKIMOS ENJOY PORK WITH RAILWAY ENGINEERS

Partake Of White Man's Diet For

First Time In Their Lives
When Major J. L. Charles, the representative of the Canadian National Railways, came to Fort Churchill on Hudson Bay, after surveying the new line which brings the middle west a seaport of its own, he and his party invited two Eskimos to have dinner with them. They were given the ice 150 miles on sledges with runners coated with frozen mud. Blubber was their usual diet and they clucked with pleasure when Major Charles asked them "to lunch and have dinner for the first time in their lives."

"We had a very mild winter," said Major Charles, on his return to Winnipeg, "and lost only six out of our 100 men. On the day we arrived with the men the snow was melting at Churchill. The Eskimos had great difficulty in travelling as their mud runners thawed out."

By the end of May, there will be at least 1,000 men on the line, the Hudson Bay Railway. The steel was laid for 356 miles north of The Pas. The total distance is more than 500 miles.

Moose Jaw Flying Club
A flying club has been organized in Moose Jaw, and applications are being received from those who wish to become members. The club is being organized by qualified pilots and will conform to the rules and regulations of the Canadian Government. The equipment of machine provided by the Government is a D.H. Moth.

Wrap the left-over roast white in bacon cloth and it will not lose its flavor.

The Annoying Taxi Driver
Not for many years had old Baxters been more than four or five miles from his native village, but having come into money, he decided to visit old friends in London and Manchester.

"Taxi, sir?" a driver hawed in his ear immediately he emerged from the London terminus.

Baxter shook his head.

After seeing London he went on to Manchester, where he left the station a taxi pulled into the curb.

"Taxi, sir?" asked his driver.

"No, no, you idiot!" snapped Baxter angrily. "I said 'no' in London. Now stop following me about."

Ernest Things Up

Pamela—"Don't Roger a naughty dog. Mummy? He ate my dolly's slipper."

Mother—"Yes, darling, he ought to be punished."

Father—"I did punis' him. I went straight to his kennel and dawnk his milk."

She—Several men presented to me before I married you.

He—"I didn't you marry the wrong fool who came along?"

She—"I did."

Always look on the bright side of things—and if you are buying them it is well to look on both sides.

"The steak is very small. It is like leather and is very dry."

"I know you seen in the papers that steak is going down and leather is going up?"—Pete Malo, Paris.

Says Stones Do Not Grow

Question Has Been Settled By Experts At Washington

"Any farmer will tell you that stones grow. That is a belief that has been over 2,000 years old, and there is no reason to do so. How often has the patient picker of stones removed all the stones near or close to the surface, making the field fair to look at only to see, after the next ploughing, more stones appear as many stones as there were before. This is another question that has been settled by the scientists, the city experts of agriculture at Washington. The stones do not grow, but drift over there decisively, absolutely, that rocks do not grow. According to them, what happens is this: Rocks of all sizes are continuously being buried to the surface by the frost. The stones are not buried, but are buried under the surface. This pushes the stones up. When this ice melts the stone does not drop back but drifts in and so the rock is lifted. Rocks thus push up from below which the stones have grown and have grown while he was sleeping. If there is any comfort in this decision, the Hon. W. R. Matherwell should endorse it for our mental welfare. —The Sun.

Speed and Common Sense

Safe Driver Is Not Necessarily a Slow Driver

It has been rather well established that laws which arbitrarily fix speed limits for drivers are little protection against accident.

At which one may safely drive depends upon the road and traffic conditions involved.

A high estimate of the number of drivers of automobiles manufacturing companies who have made a close study of speed in its relation to accidents, declares that fifty or even sixty miles an hour over good open roads in the country may be safer than fifteen miles an hour in cutting corners or diversions.

The safe driver is not necessarily the slow driver, but uses common sense whether driving fast or slow. Careless driving is liable to cause accident, but the safe driver, in his estimation, has made a close study of speed in relation to accidents, declares that fifty or even sixty miles an hour over good open roads in the country may be safer than fifteen miles an hour in cutting corners or diversions.

The safe driver is not necessarily the slow driver, but uses common sense whether driving fast or slow. Careless driving is liable to cause accident, but the safe driver, in his estimation, has made a close study of speed in relation to accidents, declares that fifty or even sixty miles an hour over good open roads in the country may be safer than fifteen miles an hour in cutting corners or diversions.

Sense, not speed, is the important factor in determining whether a driver is safe or unsafe.

Longest Sentence On Record

Statesman Used 550 Words Before

Period Was Necessary

A political speech is among the many curios in the collection at Old Court House, Hampton Court, where Christopher Wren lived.

It had a hinged style with a movable pointer. At the top end is a circular dial with a number of holes through a gauge of 20 lines of print.

Even in accepted English literature there are a few sentences breeding doubt that all things must have an end. George Meredith made one of his women characters say, "There is no end, we're good," and the gentleman who had been to her party, the night before launched into a 217 word discourse merely to prepare her for the news that the wife had been all right.

It took 100 years to get from the 1897, the author jugged a few words, phrases, clauses, and a few ideas for 550 words before he decided a period was in order.

The Annoying Taxi Driver

Phone Service To Planes

Tests, Now Being Made Which May

Prove Successful

Perfection of apparatus for communication from the home or office to the air liners of the future is the next object of engineers of the American Telephone and Telegraph Company.

They ultimately hope to extend a regular telephone service into the air so that a person using an ordinary telephone in an office or home, can speak to a person dying in a plane.

Experimental equipment has been gathered together at Washington, N.Y., to test and compare apparatus purchased for use in the tests. The plane is to be converted into a flying laboratory equipped with many of the newest devices of the radio and telephone sciences. The present tests are a continuation of efforts first made in 1918.

A Pocket Sundial

Time In Various Countries Clearly Indicated On Curve

A pocket sundial is among the many curios in the collection at Old Court House, Hampton Court, where Christopher Wren lived.

It had a hinged style with a movable pointer. At the top end is a circular dial with a number of holes through a gauge of 20 lines of print.

Even in accepted English literature there are a few sentences breeding doubt that all things must have an end. George Meredith made one of his women characters say, "There is no end, we're good," and the gentleman who had been to her party, the night before launched into a 217 word discourse merely to prepare her for the news that the wife had been all right.

It took 100 years to get from the 1897, the author jugged a few words, phrases, clauses, and a few ideas for 550 words before he decided a period was in order.

The Mosquito Pest

Bronchitis and Oil Are Best Means Known To Keep Insects Under

During the warm months of the year mosquitoes often cause a serious pest to man, but not so much in the country as in towns and cities. The many species and the life habits of this insect, as well as methods of controlling it, have been given serious study by the Entomological Branch of the Department of Agriculture, Ottawa, and in Circular No. 62 of the department, recently issued, there are outlined plans that have been found successful in bringing it under control. The mosquito passes through four stages in its life history, but requires water for its development.

Control measures therefore call for the drainage of stagnant pools and the emptying or spraying of water barrels and other receptacles in which the insect may deposit its eggs. Even though mosquito stages are present, it is not feasible, it becomes necessary to treat water surfaces with oil. A surprisingly small amount of this will suffice over a considerable surface destroying such mosquito stages as are present.

In work carried on by the Entomological Branch to control the mosquito in the district of Ottawa and in other parts of Canada, a medium size oil has given good satisfaction.

The circular, which is obtainable from the Department of Agriculture, gives explicit instructions for carrying out the oiling process and tells how to organize control campaigns for districts where the mosquito is particularly troublesome.

A Transparent Church

In Cologne, Germany, a church is now being built which will be the only one in Europe of its kind. It is constructed entirely of steel and glass, the iron having been brought from America.

The Protestant church, from America, where it appears such buildings can be ordered by post and sent, properly packed and designated, to any destination a parcel.

PROVINCE OF ALBERTA

Department of Municipal Affairs

NOTICE IS HEREBY GIVEN that unless

all arrears of taxes imposed in re-

spect of any parcel of land situated

in the Province of Alberta, with

a view to obtaining Certificates of

Title in the right of the Province of Alberta

in respect to such parcel.

W. D. SPENCE,

Deputy Minister.

EDMONTON, May 30th, 1928.

48-c

Knew Different

"Why don't you get out and hustle?"

Hans was never Miles apologetic,

remarked the philosophical gentle-

man to whom Hans applied for a

bit of charity.

"You're mistaken, man, boss," re-

plied Hans. "I've lost my wife dat

day."

No Crime of Crimes

A colored preacher was vehement-

ly denouncing the sins of his con-

gregation.

"Brethren an' sisters. Ah warn't yo' gainst de black rascality of little' bulletts. But

above all else, brethren an' sisters,

you're denacin' yo' gainst de

million' stealin'."

A brother in the back seat made an

odd sound with his lips, rose and

snapped his fingers.

"Whoof, ma' fren', what the

hell does yo' fat' up an' snap yo' fingers when Ah speaks ob

me 'n' stealin'?"

"Yo' jes' reminds me, parson," the

man in the back seat answered, merrily. "Car Ah lef' mah knife."

Hats Off

"Customer: 'Have you anything

for grey hair?'"

Concierge: "Druggist: 'Nothing

but the greatest respect, sir."

The Slipper Required

Advt. in a Scotch paper: "Wanted,

a robust, God-fearing Scotch nurse,

and has a working knowledge of the

business side of a slipper, to take

charge of a four-year-old boy, who

has a double dose of original sin."

Short Slighted

A girl with cotton stockings never

wears a nose.

Lighted Action! Comes!

Of course you haven't heard of the

poor sap who married a screen star?

Well, they separated after a fort-

night because she couldn't love him

properly without a director present.

Shine 'em Up, Boys

City Slicker: "What does your

son do?"

Farmer: "He's a bootblack in the

city."

City Slicker: "Oh, I see. You

make hay while the sun shines."

Everything a car should be or do

CHRYSLER "62"
SEDAN \$1450

CHRYSLER "62" performance
at its new lower prices re-emphasizes
Chrysler "62" superiority.

62 miles an hour plus—smooth, easy miles. 7-bearing crankshaft in perfect balance. Flashing acceleration in the 1/4 mile. unusual hill climbing ability. The easiest car to steer.

Chrysler spring seats magnetized in rubber shock insulators. Hydraulic four-wheel brakes always perfectly self-equalized for positive safety.

Chrysler stylish lines and appearance. Roomy bodies. Saddle spring seating. Unusual fitness in fittings and upholstery. Latest shades and tones in color combinations.

Take the wheel of a "62." That's the place where you can most easily prove that it is everything a car should be and does everything a car can do.

WORLD HAPPENINGS
BRIEFLY TOLD

Premier King, replying to a question in the House, said the Government had no intention of establishing legations at Buenos Aires and Mexico City.

Partial prohibition has been declared in the Yukon. An order was issued making it unlawful to sell any alcoholic drink except beer and cider.

There will be no Canadian cadets sent to the Junior Rifle corps next year, it has been announced. Wages will be received by the trainees who have to pay their own expenses.

Three delegates from Soviet Russia will attend the International Wheat Pool conference to be held in Regina on June 5 to 7 inclusive according to word received by C. P. Evans, president of the International Conference Committee.

General T. Evans, of Vancouver, B.C., was the Sutherland gold medal in biochemistry, it was announced at McGill University, when the second year student in the Faculty of Medicine was posted.

A master of fact statement in the official Turkish newspaper Milliet says that the Angora Government has passed a law forbidding the importation and use of calculating machines in Turkey under severe penalties.

E. S. Hertley, cable engineer, has gone to Victoria, B.C., where he intends to reside in future. Mr. Hertley visited the Pacific coast in 1926 with the laying of the duplicate cable between this country and Australia.

Hon. Philippe Roy, Canadian Commissioner in Paris, may be Canada's first minister to France. This was indicated by the Prime Minister when the sum of \$75,000 for representation to Paris was discussed in the Commons.

The application of the Winnipeg Board of Trade for a revision of the regulations applying to attendants travelling with race horses has been rejected by the Canadian Horse Commissioners. The application was to permit two to attendants to travel free in cars with race horses.

Norse Celebration in Winnipeg
Expected To Be the Largest Gathering Of Norwegians Ever Held
In Canada

The Norse Celebration at Winnipeg from July 6 to 10th, promises to be the largest gathering of Norwegians held in Canada. The international gathering, for thousands of Norwegians are expected from the United States and representative men from Norway will be present. Many of the Canadian and United States Bjornar or Norwegian and the League of Norwegians of Canada have arranged to hold their biennial meetings in Winnipeg during the week of the celebration.

Besides a good program of recreation, musical entertainments, there will be Norse art exhibits, several of which are being brought from Norway. The feature items in the musical programs to be given will be the men by the 1,000-voice choir of the National Singers' Association of America.

There are about 75,000 persons of Norwegian birth and origin in Canada of whom 65,000 are in the provinces of Manitoba, Saskatchewan and Alberta.

Beautifying School Grounds
Because of the co-operation of the forestry farms at Indian Head, marked progress in beautifying school grounds with trees has been made this spring. A total of 165,000 trees have been planted in 167 school grounds throughout Saskatchewan. This includes 67,700 maples, and 60,800 caragana.

Due To Irrigation
There are now eight irrigation projects in Southern Alberta covering a total acreage of 400,446, of which 188,230 acres are irrigable. One of the projects is at Lebbridge. Northern Irrigation District, recently having doubled its acreage within the past two years, trebled its production and increased its population two and a half times.

An English paper suggests that it is not so hard to escape from a flapper, "but a widow knows all the de-
tours."

Ice cream cones are turned out at the rate of 2,000 an hour by a recently perfected machine.

Take less pleasure in eating and you'll take more pleasure in living.

Has Proved
SatisfactoryGovernment Control Of Broadcasting
Works Well in England

All who have followed closely the development of radio in the United Kingdom will realize that, at least, there must be some form of Government control. Already broadcasting there has been an unceasingly erratic and unscientific matter, and with more stations established, and the likelihood of the granting of the necessary additional exclusive wave-lengths very dubious it becomes increasingly evident that the situation closely with a view to protecting the general public.

In England the Government controls of broadcasting, though it has evoked some adverse comment, has provided a technical equipment in agricultural bacteriology are provided with sensitive plates which are exposed to the air. The spores of wheat rust, floating at high altitude, are caught on the plate and analyzed. The spores have been detected at 10,000 feet. The spores have been run into clouds of these invisible organisms which have registered as many as 5,000 to the centimeter. The spores float at an altitude and when the wheat reaches them they are impregnated and thus the rust appears widely separated areas and without any visible means of contact. The use of sensitized plates and the airplane have revolutionized the methods of checking one of the menace to the wheat crop of Western Canada and the Western States.

Use of Electric Power Increasing

Canada Is Second In Per Capita Consumption Of Electricity

Norway, Canada and the United States lead the world in the per capita consumption of electricity. The Geological Survey of the United States gives the figure that authority place Canada's consumption in 1927 at 1,320 kilowatt hour per capita, compared with 690 kilowatt hours in the United States and 540 in Canada. Other statistics given in the statement afford comparison with available data for Canada showing progress on the North American continent in 1927. The increase in consumption in Canada is shown in the United States from 1920 to 1927 as 9 per cent. The output of central electric stations in Canada according to official figures of the Dominion Bureau of Statistics in 1927 was 1,000 million kilowatt hours. The output of electric power to the total population of the United States the amount produced by power was 37 per cent. In Canada, 95% of power was produced by hydroelectric power.

We were here privileged also to see one of the greatest industrial works of England, the Marconi Vickers Electrical Works. The magnitude of which could not be comprehended by the layman until he sees it. Here is made everything needed from the equipment of super-power stations to the smallest domestic apparatus.

On the morning of the 20th we were taken through Trafford Park, one of the largest industrial and manufacturing sights of England. Here there were vast storage and handling facilities for the export of iron and steel.

Sick Stomach Teacher

Her Bad Lesson

Miss Jeanne Giselle Brown, 17, writes: "I had become accustomed to arising each day with a heavy head, since my mother had a bad cold. My bowels were frequently clogged and constipated. I feel greatly relieved since taking Carter's Little Liver Pills. I take one a day. Carter's Little Liver Pills. All drugs—25¢ and 75¢ per tube."

PAINTED FIRES

Copyright, Canada, 1925

CHAPTER XXXIV—Continued.

"I cannot see anything very cheerful," said Jack, miserably. "I only know my wife has gone. Circumstantial evidence seems to be against her, but nevertheless I will do my utmost to find her. I will take her to Victoria for our honeymoon."

The matron sighed softly, but gave no mirth in the sound. "Have a drink, my dear young friend," he said, "and forget her."

"No, thank you," said Jack. "I do not drink and I am pretty sure, I will never forget her."

"The matron's voice and in his face that made Col. Blackwood wonder if he had pursued the right course. Perhaps he should tell of his coming to him to find out about the marriage. "Not then," he said. "Not then, he's got to be here. You'll have a flock of them pursuing you, anyway."

Jack was looking out at the wide view of the winter landscape, with the magnificient rivers, covered with snow, winding away into the blue distance. "I don't know what to do," he said. "I know he was right; another drink, and he was sure that he had done not only a wise but a noble thing in leaving the marriage unrecorded. After the third drink, he sat in a meditative mood, lost in thought. He was sure that young Jack Doran would come to him with tears standing in his eyes and thank him for his advice. He had been a good boy, he thought, and deserved a thousand years. I shall never be able to thank you adequately, Sir," and he would reply.

"Have done, my boy—have done; one man must ever help another!"

So the night was pleasantly on.

CHAPTER XXXV.

Not so pleasantly did the night pass with Jack Doran, who sat in the station waiting for No. 8 and listening to the wires telling their never-ending story—a dull, gray station dusty even with the snow had covered the floor, a red oil lamp lit in the middle of the floor, egg-shaped dustbins, and either freestanding or rod hot according to the mood of the agent; torn posters showing palatial white steamers ploughing green seas and carrying gold and silver to the Orient to buy lands, all for sale, while instructions had been given to the auctioneer to spare nothing, ill-health the cause of the owner's desire to sell; a stray post card from a girl who had given to the name of "Mabel" with a pencil; a dance and rattle at flannel-mad by St. Faith's Ladies' Aid, program and refreshments, and cordial invitation to all: "Save the Forest poster"; "The forest in our, let us keep it always"; John Fernwald's announcement of his ability to mend

shoes, Old Country methods and modern—try one.

Jack came back to his own better thoughts, to write to the telegraph wires made a wretched accompaniment, ghostly and grim. He could see the instrument from where he sat, muttering, tapping, clacking, with a few moments, then convulsed and戛然止息. He had the desire to be understood. He thought of all the suppressed emotions, the heart-break, anxiety and fear that were in his heart, and along the miles, and how they break into strange tappings here, checkingly and articulate.

Life was like that, he mused, we all live in a world of emotions: really hidden, but we cannot all throw it off at intervals in dust and dashes like the wires.

Reaching the city, Jack went to the Macdonald Hotel, where he met his partner, Keith, whom he had not seen since their last meeting at Peace River. They discussed their plans for the future.

"I am going to have our specimens arranged here at the University, and I will go to Victoria to Victoria for our honeymoon," said Keith.

Jack told him briefly of his domestic trouble. "I believe she is here in the city," he said in conclusion, "and I want to find her. I will not believe her to be a bad person."

Keith whistled softly. "This is bad work, boy," he said. "I am sure an angry woman. Women are the finest in the world or the worst—if they're not nice they are the other. When you begin to break off the coupons from your gold mine, start thinking you've got a flock of them pursuing you, anyway."

Jack was looking out at the wide view of the winter landscape, with the magnificient rivers, covered with snow, winding away into the blue distance. "I don't know what to do," he said. "I know he was right; another drink, and he was sure that he had done not only a wise but a noble thing in leaving the marriage unrecorded. After the third drink, he sat in a meditative mood, lost in thought. He was sure that young Jack Doran would come to him with tears standing in his eyes and thank him for his advice. He had been a good boy, he thought, and deserved a thousand years. I shall never be able to thank you adequately, Sir," and he would reply.

"Have done, my boy—have done; one man must ever help another!"

So the night was pleasantly on.

Jack Doran was in his bed, waiting for the night to pass with him. He was sure that young Jack Doran would come to him with tears standing in his eyes and thank him for his advice. He had been a good boy, he thought, and deserved a thousand years. I shall never be able to thank you adequately, Sir," and he would reply.

"Have done, my boy—have done; one man must ever help another!"

So the night was pleasantly on.

So the night was pleasantly on.

Many of Canada's leading social and sporting clubs use Red Rose Orange Pekoe Tea exclusively. The added flavor of Red Rose Orange Pekoe make it last longer, go farther and taste better. Packed in damp-proof aluminum.

book from his friend and destroyed it.

The first day Jack was in the city made a thorough search of all the tea houses, but could not find Sam. When he came to Sam's he was met by the wily proprietor, who had learned in a hard school that it is foolish to give information. Sam had only one, his knowledge of English, a precious second. "I don't know," said he, "but all at once became his entire English. (To Be Continued.)

STARTLING IDEAS SHOWN IN LATEST INVENTIONS

Rubber Fenders and Trick Camera

Spring, which so often is created with inspiring a young man to make a fortune, is a good guide to his inspiration for many other types as well. One is the itinerant automobile inventor who at this season remedies to a renewed urge to seek fame and fortune in the motor car organization.

This throng of inventive optimists again descends upon engineers with unusual instances. They come from personal inventors and the more or less amateur inventors who are not inventors.

Parents should be reminded that the child should be brought to the dentist for the first visit at the age of two, and thereafter at stated intervals.

The first visit should be made in order to establish the confidence of the young child in these surroundings.

Rubber fenders for trick cameras.

A cellular surface for a car which never leaves a gas tank to give the car fresh appearance.

The 1928 model of perpetual motion.

An automobile that uses the gasoline all day, keeps the engine running and returns the gas to the tank every evening.

A radio ignition system with call letters for each cylinder.

A warning light on the instrument panel which becomes illuminated when the driver exceeds the speed limit.

Indicators which are concealed in the side of the car in the automotive field. Custom-built inventions are their specialties. Often inventors' models fail apart before they are submitted, and some of one could invent a way to correct this, most valuable.

"Every suggestion by personal call or letter is carefully considered," said A. H. Knight, consulting engineer.

"Many of the inventions have already been invented, others have been tried and failed, but sometimes they may be of merit if the thing had been developed up to now that we are in it."

Keith was watching Jack closely, even though he was not, but he was interested in his friend, Jack, if you want to go. I'll see you for on everything I get while you're gone, and I'm going to get right after the potassium deposits and the oil as soon as I get the gold mine.

"Gosh! I liked him," said Keith, grinning; "He told us some of the richest stories I ever heard."

"I couldn't stand him and his stories," said Jack with warmth. "He's the sort of man that makes you want to yell at him."

"They can all fool me."

"Sometimes I think of enlisting," said Jack. "When I listened to that boy leaning on his crutch I wanted to go. The other old soul rather than the young one."

"Gosh! I liked him," said Keith, grinning; "He told us some of the richest stories I ever heard."

Practically all pains arising from rheumatism are relieved by Dr. Thomas' Electric Oil. Simply rub on the sore spot and it is quickly relieved. It is also good for rheumatism and is conveyed to the inflamed tissue which is quickly soothed. This fine oil removes the pain and the redness of the skin, relieves the heat and the burning of cuts, scratches, bruises and sprains. Keep a bottle handy always.

Always Ready and Reliable. Practically all pains arising from rheumatism are relieved by Dr. Thomas' Electric Oil. Simply rub on the sore spot and it is quickly relieved. It is also good for rheumatism and is conveyed to the inflamed tissue which is quickly soothed. This fine oil removes the pain and the redness of the skin, relieves the heat and the burning of cuts, scratches, bruises and sprains. Keep a bottle handy always.

American Settlers For Saskatchewan

A party of 15 land-seekers from Nebraska and North Dakota, who were brought to Canada by the Canadian National Department of the Canadian National Railways, have purchased 3,600 acres of farmland near Estevan, in the Smoky Lake district of Saskatchewan. American families have been settling the land for the past three years, and a large colony is now established there.

McBride Mandates New Braden

Two large mineral ranches of 100,000 and 150,000 acres each have been opened at Braden, a few miles north of Brandon, as well as several smaller ones.

Private landholders had told about the mud, the mud, the ice, the scratchy underwear. He was glad to think of the wealth coming to him from the gold mine, for he could not afford to give it to other people. He loved to make smooth and satiny, and beautiful rugs with deep rich colorings, music, pictures; but especially did he want these things for himself.

No matter what Jack's thoughts began they would soon come back to him. He wondered if she had got the two hundred dollars all right. He had been thinking about it, and sent for it when they were outsting at the bar. But Keith had a bigger share, and then they were all right. He had even written out an order for a friend of Keith's to get it when he went to Eagle Mine. What had he done with that order? Keith got it.

He had been setting the land for the past three years, and a large colony is now established there.

Puzzling To Tourists

Americans Know Practically Nothing About Canada's Banking System

American tourists merrily through Canada are astounded by the size of the figures on the bank windows. After being accustomed in the smaller towns to see signs such as "Capital, \$10,000; Total, \$10,000," painted on the front door of their local bank, they see, in the smallest hamlets on Canadian highways, bank windows to the value of \$20,000,000. They must be astounded and sorely perplexed. How could such a small town support a bank of that size?

The figures on the bank windows of the Canadian banks are most misleading. They are not the only ones to be confused by the size of the figures.

TORGAN'S

GROCERIA and MEN'S WEAR

WHO LOWERED THE COST OF LIVING FOR THIS DISTRICT

Local News

Church Ladies' Aid will hold a tea and sale of cooking in the church basement on Thursday, June 11th, from 3 to 6 p.m.

Mr. and Mrs. Chas. Benjamin and family and Mr. and Mrs. A. Horning and family, of Calgary, motored to Bassano Sunday to spend the day with Mrs. J. Tozer and family.

BASEBALL - GAME SUNDAY

The Bassano and Hussar baseball teams are scheduled for a game at Bassano on Sunday evening, June 11th. The game starts at 2:30. Hussar has already played Hussar twice, and the local boys won both games.

ONLY THREE APPEALS AGAINST ASSESSMENT

The court of appeal against assessment of town property was held in the new Hall on Monday evening last, June 4th. There were only three appeals against assessment. This is the lowest number on record. All three appeals were from no-resident rate payers, in each case the assessment was sustained.

STOCK DIP

The stock dip and dip at Lethbridge, Roseberry, and Green with stripes. Powder with stripes, and Green with stripes. Sizes 30, 32, and 34. No change has been made in the date.

FINED FOR TAKING HORSES FROM ROUND-UP

Otto Enrich, of Hussar, was convicted by Police Magistrate A. G. Bond under the Domestic Animals Ordinance, for taking four head of horses out of the government roundup. The case was heard in the police court, Bassano, on Wednesday, June 6th. Enrich was fined \$1.00 and costs.

This is the first case of the kind to come before Magistrate Bond. A maximum fine of \$100.00 and costs may be imposed for this offence.

WEDDING

Fife - Briggs
Mr. Paul Fife and Miss Alice Briggs, of Patricia, were united in marriage on Tuesday, June 8th, at the Presbyterian Manse, Bassano. The Rev. A. O. Thomson was the officiating clergyman.

ROY CHESTERLY MINER

Roy Chesterly Miner, aged 26, farmer, 24 miles north-east of Hussar, was killed Friday afternoon, May 18th, in a mix-up with his team. He died within an hour of the accident. How the accident happened, no one knows, for it was not possible to interview the teamster. Mr. Miner had driven to get a load of green feed, returned driverless. It was assumed either that Mr. Miner was kicked to death by the horses in a mix-up, or that he somehow fell and the wheel of the wagon rolled over his head, which was fractured.

There was no inquest. The funeral was held Monday afternoon, May 21st at 2 o'clock, in Shaver's Funeral Chapel, Calgary.

Roy Miner was the fourth son of

Geo. W. Miner and the late John C. Curry Miner, of Wall Brook, King's County, Nova Scotia. Mr. Miner came west ten years ago. The first

two years he was around Lomond,

and the remaining eight years in the Hussar district. He was a general favorite and loved by all who knew him.

The funeral service was conducted

by Rev. Eberle, assistant pastor of the First Baptist Church, Calgary.

The casket was banked with flowers

from relatives and friends.

Interment was at Burland Cemetery.

George W. Miner, his father, died

in 1918, and his mother, Mrs. W. W. A. Smith, Hussar, Alta., died

in 1919. Mrs. T. Hobbs, Omaha, Nebraska;

Mr. Frank L. Morton, Nak-

uske, B. C.
